

SPARKPOWER™

DISTRIBUTED ENERGY RESOURCES

CREATE, CHOOSE, AND CONTROL YOUR RENEWABLE POWER.

Imagine how energy-efficient your facility would be if it could create, distribute, and store its own wind and solar power. Now imagine how much money you could save in the process. Distributed energy resources (DERs) reduce your reliance on an overtaxed grid and the costs and risks associated with it.

THE RIGHT SOURCE OF POWER

Identifying the ideal source of power for your business based on its needs and current infrastructure.

Solar and wind

Integrating and connecting renewable power generating equipment on-site:

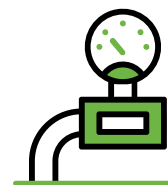

- Solar photovoltaics
- Wind turbines

Combined heat and power

Capturing and using thermal energy that's already being created via electrical generation:

- Micro-turbines
- Fuel cells

Natural gas generators

Keep your business operating if the grid goes down with reliable backup power:

- Gas turbines
- Genset installation

End-to-end DER system service: From commissioning (design, build, and start-up) to component installation, we'll handle all aspects of bringing your DER system online.

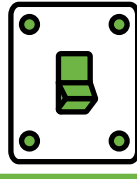

ON-SITE BATTERY STORAGE

Enjoy the convenience and reliability of readily available back-up power with behind-the-meter battery storage.

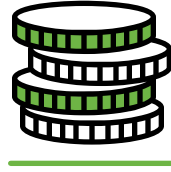

Lower peak demand and save

Battery storage can help lower peak demand and reduce your monthly global adjustment (GA) charges.

Instant access to energy-on-demand

Unlock power you have already stored and keep your business operating.

Additional revenue for your business

On-site battery storage can be a new source of revenue via the ancillary services market.

HEALTH AND SAFETY

When it comes to safety, **only zero is acceptable. Zero** accidents at work.
Zero compromise to prioritizing safety.

Spark Power is a leading independent provider of end-to-end electrical services, operations and maintenance services, and energy sustainability solutions to the industrial, commercial, utility, and renewable asset markets in North America. We work to earn the right to be our customers' Trusted Partner in Power™. In the state of California, we operate under license #533593. In the state of Texas, we operate under license #TECL-34613.
