

SPARKPOWER™

**PROVIDING
END-TO-END
POWER
SOLUTIONS**

ABOUT US

Spark Power is a leading independent provider of power services across North America. For over 50 years, we have strived to be our customers' Trusted Partner in Power™ by providing scalable, end-to-end electrical contracting services, operations and maintenance services, as well as energy sustainability solutions, to industrial, commercial, utility, and renewable asset markets.

Our highly skilled and dedicated people, located in the communities we serve, combined with our knowledge of the power industry, technology expertise, and commitment to safety, ensures we deliver the right solutions to meet our customers' needs.

WE ARE YOUR TRUSTED PARTNER IN POWER™

We are independent

- Unbiased service provider
- Pole-to-Product™
- Relationships over transactions

We are local

- Community-based
- Local service with continent-wide expertise
- Certified, well-trained, teams

We have scale

- Award-winning health & safety programs
- Flexible and responsive
- Right ideas and solutions

ONLY ZERO IS ACCEPTABLE

When it comes to safety, only zero is acceptable. Zero safety incidents. Zero compromise to prioritizing safety. By building a culture of safety across all areas of business, Spark Power can ensure that our customers receive high-quality, reliable, and efficient service while ensuring that all applicable statutory and regulatory obligations are met or exceeded.

TECHNICAL SERVICES

HIGH & MEDIUM VOLTAGE SERVICES

Spark Power delivers integrated, end-to-end service solutions for high and medium voltage systems. We work with industrial, commercial, institutional (ICI) and utility customers across Canada and the U.S. Our staff of highly trained engineers, tradespersons, and technicians provide inspections, maintenance, engineering services, commissioning services, testing, repairs, upgrade work, and replacements to ensure the long-term safety and reliability of power infrastructures. These include:

- Engineering studies
- Engineering design services
- Substation construction
- Powerline construction and maintenance
- Power “on” services
- Commissioning services
- Preventive maintenance

EQUIPMENT SALES & RENTALS

Spark Equipment provides a wide variety of new, used, and rental solutions for low and medium voltage power distribution equipment, including transformation, switching, circuit breakers, and fusing along with an extensive in-stock equipment inventory.

We provide reconditioning and repair services for a wide variety of low and medium voltage equipment. Through our fabrication facility, Spark can disassemble, evaluate, test, and replace or rebuild internal and external components, as required, to meet customer needs.

LOW VOLTAGE SERVICES

Spark Power delivers a full offering of electrical contracting and automation services, including 24/7 emergency service support. Our technical services include:

- Plant expansions and upgrades
- Maintenance services
- Equipment safety and controls upgrades
- Electrical and automation troubleshooting
- Power up and commissioning services
- Turnkey automation solutions
- Control panels
- Electronic repairs
- Energy efficiency initiatives

ENGINEERING SERVICES

Spark Power offers reliable and high-quality engineering services to large industrial, commercial, utility and renewable customers across Canada and the U.S. Through our full-service approach, we offer the following services focused on our customers’ electrical distribution systems:

- Feasibility and owner’s engineering
- Multi-disciplinary detailed design (electrical, civil, structural, mechanical)
- Protection and control, SCADA design, programming and commissioning services
- Power system studies
- Utility interconnection advisory
- Drafting and document control

RENEWABLE ASSET SERVICES & SUSTAINABILITY SOLUTIONS

SOLAR

Our extensive experience in solar energy services allows us to deliver a complete suite of offerings that are essential to the life and value of your solar projects. Our capabilities include a full range of experience required to build, operate, and service solar power generation assets. These include:

- Site management and full-time technician staffing
- Preventive and corrective maintenance
- Balance of plant maintenance
- Operational monitoring, reporting, dispatch, and ticket management
- Performance analytics
- Enterprise asset management
- Repowering, major repairs, and retrofits
- Commissioning and quality assurance/quality control

ENERGY STORAGE

Spark Power's experience in energy storage can improve your project's resiliency and offer considerable cost savings. Through this service, we can:

- Enhance your power system
- Provide monitoring, construction services, and operations and maintenance supports
- Take your facility off-the-grid during periods of peak demand

SUSTAINABILITY SOLUTIONS FROM BULLFROG POWER

Through Spark Power's sustainability division, Bullfrog Power, we offer smart and sustainable energy solutions that enable businesses and individuals to reduce their environmental impact, support the development of green energy projects, and transform our energy systems. As a Certified B Corporation, Bullfrog Power meets higher standards of social and environmental performance, transparency, and accountability.

WIND

Spark's expertise in wind energy services can help to ensure the long-term performance and reliability of your wind power assets. We provide a complete suite of services to developers, asset owners, and OEM's:

- Technical asset management and performance monitoring
- Scheduled maintenance
- Quality assurance
- Commissioning
- Preventive and corrective maintenance services
- Labor support services
- End of Warranty campaigns
- Testing and analysis requirements
- MV/substation/balance of plant

ELECTRIC VEHICLE INFRASTRUCTURE

We offer seamless implementation and integration of electric vehicle charging systems. This includes:

- Turnkey installation
- Project management
- Maintenance services for your electric vehicle infrastructure project
