

SPARKPOWER™ POWER MANAGEMENT

OPTIMIZE ENERGY CONSUMPTION. MINIMIZE ENERGY COSTS.

Power is a key component of business cost and overhead. Controlling where it comes from, when it's used, and how it's deployed can help you save-and make-money. Power management services tells you exactly how much power you're using and losing. No more wondering. No more guessing.

DETAILED DATA COLLECTION

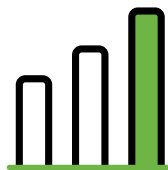

Your electricity consumption holds the key to significant cost-saving opportunities for your business. Learn what the numbers mean and how you can improve on them.

Audit

Monitoring your power systems and spotting any energy consumption patterns:

- Power lags, losses, and strains
- Voltage data
- Overall MWh used
- Dollars spent on power consumption

Analyze

Making sense of the information and using it to help your business' bottom line:

- Load analysis
- Power quality analysis
- Billing structure analysis
- Energy efficiency analysis

Act

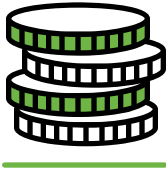

Recommending strategies to help you waste less power and improve overall efficiency:

- Power equipment replacement
- Power factor correction

Ongoing monitoring: Tracking power performance after management strategies are in place allows us to suggest further adjustments. It also provides predictive insight into potential equipment failure.

SOLVING YOUR POWER PROBLEMS

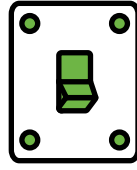

Get greater insight, influence, and control over the power your business needs in a variety of ways.

Cost

Understand what power costs, how it's calculated, and where you can save:

- Global adjustment (GA) expenses
- Peak prediction charges

Reliability

Ensure the grid always delivers the power you need, when you need it:

- Brownout/blackout avoidance
- Improved power predictability
- Voltage sags

Sustainability

Keep your business on track to hit any sustainability targets:

- Renewable energy adoption (RE100)
- Power reduction goals

Only pay for what you use: Power management enables your business to help the environment by conserving energy. It also helps bottom line profitability by saving money on your power costs.

HEALTH AND SAFETY

When it comes to safety, **only zero is acceptable. Zero** accidents at work. **Zero** compromise to prioritizing safety.

Spark Power is a leading independent provider of end-to-end electrical services, operations and maintenance services, and energy sustainability solutions to the industrial, commercial, utility, and renewable asset markets in North America. We work to earn the right to be our customers' Trusted Partner in Power™. In the state of California, we operate under license #533593. In the state of Texas, we operate under license #TECL-34613.
