

PREVENTATIVE MAINTENANCE

Plan your electrical maintenance activities with ease. We provide end-to-end solutions to protect and prolong your high and low voltage assets.

FULL SERVICE

Providing end-to-end electrical contracting, operations and maintenance services for industrial facilities, OEMs and utilities across North America.

EXPERIENCED

Over 1000+ highly skilled, dedicated, technicians have the knowledge and expertise to deliver solutions from consultation & design through to installation & maintenance.

RESPONSIVE

We mobilize our dedicated technicians quickly and efficiently to your site to optimize your facility, minimize downtime, and maintain your productivity.

Detailed Inspections:

Our team will provide ongoing visual and performance checks to avoid failures, maintain a safe working environment, and eliminate compliance issues.

Advanced Testing Technology:

We'll utilize state-of-the-art, in-house lab testing services to provide you with information, recommendations, and peace of mind.

Energized Equipment Service:

We can perform maintenance without any downtime. That means your equipment remains operational, productive, and profitable while we provide service.

Optimize your plant performance, year over year, by analyzing test results and evaluating equipment. Determine the best plan of action to ensure you are hitting your uptime and safety targets while being mindful of your bottom line.

Thermographic scans

Infrared scans locate potential hazards that you can't always see.

Panel Inspections

Make certain your control panels are operational and problem-free.

Safety Checks

Protecting the safety of your equipment and the people using it.

Arc Flash Studies

Find and resolve system and operator risks within your facility.

Coordination Studies

Detailed analysis of circuit and equipment failure and its impact in your facility.

Short Circuit Studies

Determining the fault current available throughout your system.
