

SPARKPOWER™ RENEWABLE ASSET SUPPORT

MINIMIZE DOWNTIME. MAXIMIZE PERFORMANCE.

Your wind and solar assets have two jobs: Deliver consistent power and consistent value. Ongoing support is the smartest and most cost-effective way to do both. Spark Power operations and management (O&M) technical services specializes in delivering essential maintenance and superior customer support. Our job as your renewable asset service provider is to make your job regarding O&M easier.

SOLAR ASSET MAINTENANCE

Comprehensive and custom maintenance to keep your solar farm, regardless of size, operational and profitable:

Remote project monitoring

Monitoring the performance and output data of your solar assets:

- Technician dispatching in response to real-time issues
- Work order management based on predictive data

Event reporting

Recording key facets of ongoing maintenance and work activities:

- Progress photos of work being done
- Measurement values
- Task completion checklists

Repairs and replacement

Developing turnkey maintenance programs along with:

- Prompt alarm response
- Voltage testing
- Panel cleaning
- Structural inspections

Substation maintenance: Get peace of mind with complete maintenance for utility-scale solar (and wind) projects. Includes end-to-end testing of protection and controls, switchgear maintenance, and insulating oil property and gas analysis.

WIND ASSET MAINTENANCE

From the bottom of the base to the tip of the blade, Spark Power keeps your wind turbines rotating reliably.

Monitoring and analytics

Tracking performance data like power output and asset downtime and responding accordingly:

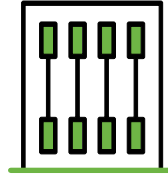

- Immediate technician dispatching
- Real-time work order management

Proactive maintenance

Identifying and managing issues to extend the lifespan of your wind asset investment:

- Reduction in kWh
- Component degradation alerts
- Change in operating conditions

Repairs and replacement

Ensuring the key elements of your wind asset are safe, reliable, and operational:

- Hydraulic systems
- Anemometers
- Cables
- Gearboxes

Emergency service: Downtime and lost production is not an option. Emergency response and power recovery services from Spark Power get your wind (and solar) assets online and operational ASAP.

HEALTH AND SAFETY

When it comes to safety, **only zero is acceptable. Zero** accidents at work. **Zero** compromise to prioritizing safety.

Spark Power is a leading independent provider of end-to-end electrical services, operations and maintenance services, and energy sustainability solutions to the industrial, commercial, utility, and renewable asset markets in North America. We work to earn the right to be our customers' Trusted Partner in Power™. In the state of California, we operate under license #533593. In the state of Texas, we operate under license #TECL-34613.
