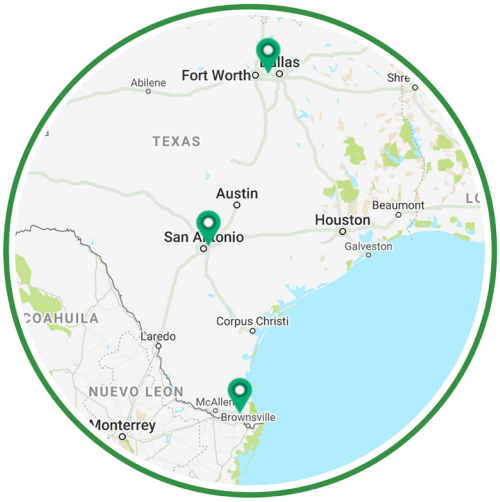
KEEPING TEXAS' FACILITIES UP AND RUNNING

Our teams in Texas are equipped to serve your local industrial/institutional facilities



We are your Trusted Partner in Power providing you with Pole-to-Product services

Electrical systems service:
Servicing switchgear, transformers, substations, distribution equipment, as well as in plant electrical systems.

Emergency systems:
Protecting equipment and workers with emergency power generation, battery system, back-up lighting, and emergency signage testing.

Medium voltage installation:
Primary and secondary pole line installations, from transmission to distribution, and 24/7 downed power line repairs.

Preventative maintenance:
Reducing risk to sustainable production through annual preventative maintenance programs and electrical systems inspections

Critical electrical projects:
Design engineering, procurement, scheduling, installation, and equipment integration services for your accelerated or expanded projects

Automation & controls:
Delivering complete turnkey solutions as well as a full suite of automation services, including commissioning assistance, trouble shooting and emergency service.

Panels, switches & breakers:
Making sure control panels, transfer switches, breakers, and annunciators properly perform and display information.

Lighting & security systems:
Small to large-scale installation of electrical and power equipment and systems, by specialized technicians.

Emergency service:
24/7 emergency service response for all your electrical and automation service needs

We are independent
- Unbiased service provider
- Pole-to-Product™
- Relationships over transactions

We are local
- Community-based
- Local service with continent-wide expertise
- Certified and well trained

We have scale
- Award-winning health & safety programs
- Flexible and responsive
- Right ideas and solutions

Safety is our #1 Priority: We are constantly evaluating the information we receive from governments, health agencies, our customers, and our employees to ensure we are doing everything possible to help control the spread of the COVID-19 virus, while ensuring we can keep our customers up and running, safely.
